## Preeclampsia screening - Measurement of uterine artery PI

Dear Wojciech Kocon,

Thank you for submitting your logbook of 3 images. I examined each image for the following criteria: sagittal section , angle of insonation angle less than 30 degrees , velocity more than 60 cm/s , and sample volume 2.0 mm (see table below).

<b>Criteria</b>	<b>Image number</b>		
	<b>1</b>	<b>2</b>	<b>3</b>
Sagittal section	✓	✓	✓
Insonation angle < 30°	✓	✓	✓
Velocity > 60 cm/s	✓	✓	✓
Sample Volume 2.0 mm	✓	✓	✓

Legend: ✓ = pass    ✗ = fail    -- = not possible to assess

Your images are satisfactory. Your software license will include the assessment of **uterine artery flow** in the risk calculation for preeclampsia and your name will appear on the list of sonographers certified for assessment of uterine artery flow.

Best wishes,

Olga Khoury Carter
